Background info: Seattle, King County, LA, Portland, and Hawaii have all recognized that homelessness is a crisis in their communities. Local communities and individual states can and should invest more resources to provide housing and services. **The Federal government must also act NOW to provide more housing for people who are trying to survive on our streets.**

This event is being organized by Catholic Community Services of King County, with support from the Washington Low Income Housing Alliance, All Home, Plymouth Housing Group, Downtown Emergency Service Center, Compass Housing Alliance, Church Council of Greater Seattle, the Seattle/King County Coalition on Homelessness, and others.
